

CSS Basics

1. Add CSS comments in your CSS block.

Answer:

```
<!DOCTYPE html>
<html>
<head>
<style>

/* This is a CSS comment */

/* Style for heading */
h1{
    color: blue;
    text-align: center;
}

/* Style for paragraph */
p{
    color: green;
    font-size: 20px;
}
</style>
</head>
<body>
<h1>CSS Comments Example</h1>
<p>This paragraph is styled using CSS.</p>
</body>
</html>
```

2. Create a page with different background-colour of a page and set an image as the background-image of a page (image should not scroll with the rest of the page and specify the size of a background image)

Answer:

```
<!DOCTYPE html>
<html>
<head>
<style>
body{
    background-color: lightblue;
    background-image: url("background.jpg");
    background-repeat: no-repeat;
    background-size: cover;
    background-attachment: fixed;
}
h1{
    text-align: center;
    color: white;
}
</style>
</head>
<body>
<h1>Background Image Example</h1>
<p>Scroll the page. The background image remains fixed.</p>
<br><br><br><br><br><br><br><br><br>
```

```
<p>More Content...</p>
</body>
</html>
```

3. Create a different page with the width, style and color of the 4 border-style(set different borders on each side with different patterns).

Answer:

```
<!DOCTYPE html>
<html>
<head>
<style>
div{
    width: 300px;
    padding: 20px;
    border-top: 5px solid red;
    border-right: 5px dashed blue;
    border-bottom: 5px dotted green;
    border-left: 5px double orange;
}
</style>
</head>
<body>
<div>
    Different Border Styles Example
</div>
</body>
</html>
```

4. Develop a page and set the height:(in pixels and %) and width:(in pixels and %) on elements.

Answer:

```
<!DOCTYPE html>
<html>
<head>
<style>
.box1{
    width: 300px;
    height: 150px;
    background-color: lightgreen;
    margin-bottom: 20px;
}
.box2{
    width: 50%;
    height: 30%;
    background-color: lightcoral;
}
</style>
</head>
<body>
<div class="box1">
    Width: 300px<br>
    Height: 150px
</div>
<div class="box2">
```

```
        Width: 50%<br>
        Height: 30%
</div>
</body>
</html>
```

5. Develop a page with different font-styles, font-size, font-family, colors and text-align.

Answer:

```
<!DOCTYPE html>
<html>
<head>
<style>
h1{
    font-family: Arial;
    font-size: 36px;
    color: blue;
    text-align: center;
}
h2{
    font-family: "Times New Roman";
    font-size: 28px;
    color: red;
    text-align: left;
}
p{
    font-family: Verdana;
    font-size: 18px;
    font-style: italic;
    color: green;
    text-align: justify;
}
</style>
</head>
<body>
<h1>Welcome to CSS</h1>
<h2>Font Example</h2>
<p>
This paragraph demonstrates different font family, font size,
font style, color and text alignment in CSS.
</p>
</body>
</html>
```

Things to know:

1. Importance of HTML DOCTYPE?

Answer:

DOCTYPE (<!DOCTYPE html>) tells the browser that the document is written in HTML5 and instructs it to render the page in **Standards Mode**.

Importance:

- Declares the HTML version.
- Ensures browsers display pages consistently.
- Enables HTML5 features.

- Prevents browsers from switching to Quirks Mode.
- Improves compatibility across different browsers.

2. What is the syntax to link external style sheet?

Answer:

Use the <link> tag inside the <head> section.

```
<head>
```

```
<link rel="stylesheet" href="style.css">
```

```
</head>
```

Explanation:

- rel="stylesheet" specifies that the linked file is a CSS stylesheet.
- href="style.css" specifies the path to the external CSS file.
