```
<!DOCTYPE html>
<html>
<head>
    <title>Input Types</title>
</head>

<body>

<h2>HTML Form</h2>

<form>

Name:
<input type="text"><br><br>

Password:
<input type="password"><br><br>

Gender:
<input type="radio" name="gender">Male
<input type="radio" name="gender">Female
<br><br>

Languages:
<input type="checkbox">Java
<input type="checkbox">Python
<input type="checkbox">HTML
<br><br>

<input type="button" value="Click Me">

<input type="submit">

<input type="reset">
```

```
</form>
```

```
</body>
```

```
</html>
```

2. HTML5 input Types.

type=number, range, color, date, file, time, month, week, email.

Answer:

HTML code:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
    <title>HTML5 Input Types</title>
```

```
</head>
```

```
<body>
```

```
<form>
```

Number:

```
<input type="number"><br><br>
```

Range:

```
<input type="range"><br><br>
```

Color:

```
<input type="color"><br><br>
```

Date:

```
<input type="date"><br><br>
```

File:

```
<input type="file"><br><br>
```

Time:

```
<input type="time"><br><br>
```

Month:

```
<input type="month"><br><br>
```

Week:

```
<input type="week"><br><br>
```

Email:

```
<input type="email"><br><br>
```

```
<input type="submit">
```

```
</form>
```

```
</body>
```

```
</html>
```

3. Apply all of the below input restrictions.

disabled, max, maxlength, min, readonly, required, size, value,

Answer:

HTML code:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
    <title>Input Restrictions</title>
```

```
</head>
```

```
<body>
```

```
<form>
```

Disabled:

```
<input type="text" value="Disabled" disabled>
```

```
<br><br>
```

Readonly:

```
<input type="text" value="Read Only" readonly>
```

```
<br><br>
```

Required:

```
<input type="text" required>
```

```
<br><br>
```

Max Length:

```
<input type="text" maxlength="10">
```

```
<br><br>
```

Size:

```
<input type="text" size="30">
```

```
<br><br>
```

Age:

```
<input type="number" min="18" max="60">
```

```
<br><br>
```

Value:

```
<input type="text" value="Suman">
```

```
<br><br>
```

```
<input type="submit">
```

```
</form>
```

```
</body>
```

```
</html>
```

4. Develop a web page using target attribute.

Answer:

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
    <title>Target Attribute</title>
</head>

<body>

<h2>Target Attribute Example</h2>

<a href="https://www.google.com" target="_blank">
Open Google in New Tab
</a>

<br><br>

<a href="https://www.wikipedia.org" target="_self">
Open Wikipedia in Same Tab
</a>

</body>
</html>
```

5. Use I-frames and Marquee in your webpage.

Answer:

HTML Code:

```
<!DOCTYPE html>
<html>
<head>
    <title>Iframe and Marquee</title>
</head>

<body>

<marquee behavior="scroll" direction="left">
Welcome to HTML5 Lab
</marquee>

<br><br>

<iframe
src="https://www.wikipedia.org"
width="600"
height="300">
</iframe>
</body>
</html>
```

Good to know:

1. Try applying as many attributes and restrictions and observe the form behavior.

Answer:

Common Input Attributes:

Attribute	Purpose
type	Specifies the input type
placeholder	Displays a hint inside the input field
required	Makes the field mandatory
readonly	Prevents editing while allowing the value to be submitted
disabled	Disables the input and excludes it from form submission
maxlength	Limits the number of characters
min	Specifies the minimum allowed value
max	Specifies the maximum allowed value
size	Sets the visible width of the input
value	Sets the default value

2. Understand the difference between target:blank and target:self.

Answer:

target="_blank"	target="_self"
Opens the linked page in a new tab or window	Opens the linked page in the current tab (default behavior)
Keeps the current page open	Replaces the current page
Commonly used for external links	Commonly used for internal navigation

Example

```
<a href="page2.html" target="_blank">New Tab</a>  
<a href="page2.html" target="_self">Same Tab</a>
```
